

California OES Weather Threat Briefing

Wednesday, November 17, 2021
9:00 AM PST

Day 1 (Wednesday): No widespread weather impacts are expected today and tonight. Some areas of dense fog will bring low visibility through late morning across coastal southern California.

National Weather Service
Western Region Headquarters
Regional Operations Center
Salt Lake City, UT

WEATHER KEY POINTS

11/17/21 - 11/23/21

Wednesday-Tuesday

- Areas of overnight and morning dense fog will be present across coastal California through late week, bringing periods of greatly reduced visibility at times
- The next storm system will bring breezy conditions, light rain, and some higher elevation light snow showers to northern California later Thursday and Friday, though no significant impacts are expected. Precipitation amounts look to average less than 0.25 inches.
- Fire weather conditions across coastal southern California may become elevated once again Sunday and Monday as gusty Santa Ana winds develop, however this is expected to be a weak wind event at this time
